About

I'm an experienced designer living at the intersection of Visual, UI and UX Design. I spent years in the fast-paced world of advertising before my passion for people and building things led me away from Madison Ave and into the world of product design. I've created and launched my own app, have managed teams of designers and genuinely love what I do.

Experience

Product Designer – Senior Product Designer 2016 – Current
The Orchard; New York City

I'm currently part of multiple agile teams creating and improving features to make it easy for record labels to manage their catalogs, launch new releases and see all of their analytics and accounting data. I've also taken the lead improving the visual design of our software and products companywide.

Senior Designer 2014 – 2016
Partners Andrews Aldridge; London, UK

Helped redesign one of the biggest energy company in the UK's website from the ground up. I started with low fidelity prototypes through style guides and UI Kits to ultimately deliver an experience that makes common tasks users are looking to complete, easy.

Designer – Senior Designer 2009 – 2014
Noise; New York City

As lead designer, my role was to redesign Chase Ultimate Rewards® Travel. I managed a team of 3+ designers, kept hundreds of PSDs across three screen-sizes insync and stayed aligned with multiple partner agencies to create a responsive and user-friendly website.

Founder / Designer 2011
Fonzi (iOS app)

Created and launched a mobile jukebox app for iOS. It was featured in the staff favorites section of the iTunes store.

Design Intern 2008 – 2009
Brolik; Philadelphia

Designed logos, print collateral and websites. Additionally while here, I learned how to translate my designs into front-end code.

Education

B.S. Graphic Design Communication 2009
Philadelphia University
